

# Rules and Regulations

Federal Register

Vol. 60, No. 138

Wednesday, July 19, 1995

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

#### 7 CFR Part 989

[FV95-989-2FIR]

#### Raisins Produced From Grapes Grown In California; Final Free and Reserve Percentages for the 1994-95 Crop Year for Natural (sun-dried) Seedless Raisins

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Final rule.

**SUMMARY:** The Department of Agriculture (Department) is adopting, without change, the provisions of an interim final rule which established final free and reserve percentages for 1994-95 crop Natural (sun-dried) Seedless raisins. The percentages are 77 percent free and 23 percent reserve. These percentages are intended to stabilize supplies and prices and to help counter the destabilizing effects of the burdensome oversupply situation facing the raisin industry. This rule was recommended by the Raisin Administrative Committee (Committee), the body which locally administers the marketing order.

**EFFECTIVE DATE:** August 18, 1995.

**FOR FURTHER INFORMATION CONTACT:** Richard Van Diest, Marketing Specialist, California Marketing Field Office, Fruit and Vegetable Division, AMS, USDA, 2202 Monterey Street, suite 102B, Fresno, California 93721; telephone: 209-487-5901 or Mark A. Slupek, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, room 2523-S, P.O. Box 96456, Washington, DC 20090-6456; telephone: 202-205-2830.

**SUPPLEMENTARY INFORMATION:** This final rule is issued under marketing agreement and Order No. 989 (7 CFR

part 989), both as amended, regulating the handling of raisins produced from grapes grown in California, hereinafter referred to as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the "Act."

The Department of Agriculture (Department) is issuing this rule in conformance with Executive Order 12866.

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. Under the marketing order provisions now in effect, final free and reserve percentages may be established for raisins acquired by handlers during the crop year. This action finalizes final free and reserve percentages for Natural (sun-dried) Seedless raisins for the 1994-95 crop year, beginning August 1, 1994, through July 31, 1995. This final rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or to be exempt therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing, the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his/her principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after the date of the entry of the ruling.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened.

Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 20 handlers of California raisins who are subject to regulation under the raisin marketing order, and approximately 4,500 producers in the regulated area. Small agricultural service firms have been defined by the Small Business Administration (13 CFR 121.601) as those whose annual receipts (from all sources) are less than \$5,000,000, and small agricultural producers are defined as those having annual receipts of less than \$500,000. No more than eight handlers, and a majority of producers, of California raisins may be classified as small entities. Twelve of the 20 handlers subject to regulation have annual sales estimated to be at least \$5,000,000, and the remaining eight handlers have sales less than \$5,000,000, excluding receipts from any other sources.

An interim final rule was published in the **Federal Register** on May 17, 1995 (60 FR 26344), with an effective date of May 17, 1995. That rule established final free and reserve percentages for Natural (sun-dried) Seedless raisins for the 1994-95 crop year. The percentages were established in a new section 989.248 of the rules and regulations in effect under the marketing order. That rule provided a 30-day comment period which ended June 16, 1995. No comments were received.

The order prescribes procedures for computing trade demands and preliminary and final percentages that establish the amount of raisins that can be marketed throughout the season. The regulations apply to all handlers of California raisins. Raisins in the free percentage category may be shipped immediately to any market, while reserve raisins must be held by handlers in a reserve pool for the account of the Committee. Under the order, reserve raisins may be: Sold at a later date by the Committee to handlers for free use; used in diversion programs; exported to authorized countries; carried over as a hedge against a short crop the following year; or disposed of in other outlets noncompetitive with those for free tonnage raisins.

While this rule continues in effect restrictions limiting the amount of Natural (sun-dried) Seedless raisins that enter domestic markets, final free and reserve percentages are intended to lessen the impact of the oversupply situation facing the industry and promote stronger marketing conditions, thus stabilizing prices and supplies and improving grower returns. In addition to the quantity of raisins released under the preliminary percentages and the final percentages, the order specifies methods to make available additional raisins to handlers by requiring sales of reserve pool raisins for use as free tonnage raisins under "10 plus 10" offers, and authorizing sales of reserve raisins under certain conditions.

The Department's "Guidelines for Fruit, Vegetable, and Specialty Crop Marketing Orders" specifies that 110 percent of recent years' sales should be made available to primary markets each season before recommendations for volume regulation are approved. This goal is met by the establishment of a final percentage which releases 100 percent of the computed trade demand and the additional release of reserve raisins to handlers under "10 plus 10" offers. The "10 plus 10" offers are two simultaneous offers of reserve pool raisins which are made available to handlers each season. For each such offer, a quantity of raisins equal to 10 percent of the prior year's shipments is made available for free use.

Pursuant to section 989.54(a) of the order, the Committee met on August 15, 1994, to review shipment and inventory data, and other matters relating to the supplies of raisins of all varietal types. The Committee computed a trade demand for each varietal type for which a free tonnage percentage might be recommended. The trade demand is 90 percent of the prior year's shipments of free tonnage and reserve tonnage raisins sold for free use for each varietal type into all market outlets, adjusted by subtracting the carryin of each varietal type on August 1 of the current crop year and by adding to the trade demand the desirable carryout for each varietal type at the end of that crop year. As specified in section 989.154, the desirable carryout for each varietal type shall be equal to the shipments of free tonnage raisins of the prior crop year during the months of August, September, and one half of October. If the prior year's shipments are limited because of crop conditions, the total shipments during that period of time during one of the three years preceding the prior crop year may be used. In accordance with these provisions, the Committee computed and announced a

1994-95 trade demand of 294,422 tons for Natural (sun-dried) Seedless raisins.

As required under section 989.54(b) of the order, the Committee met on October 5, 1994, and computed and announced a preliminary crop estimate and preliminary free and reserve percentages for Natural (sun-dried) Seedless raisins which released 65 percent of the trade demand since the field price had not been established. The preliminary crop estimate and preliminary free and reserve percentages were as follows: 404,677 tons, and 47 percent free and 53 percent reserve. The Committee authorized the Committee staff to modify the preliminary percentages to release 85 percent of the trade demand when the field price was established. The preliminary percentages for Natural (sun-dried) Seedless raisins were adjusted soon thereafter to 62 percent free and 38 percent reserve.

Also at that meeting, the Committee computed and announced preliminary crop estimates and preliminary free and reserve percentages for Dipped Seedless, Oleate and Related Seedless, Golden Seedless, Zante Currant, Sultana, Muscat, Monukka, and Other Seedless raisins. On January 12, 1995, the Committee determined that volume control percentages only were warranted for Zante Currant, Other Seedless, and Natural (sun-dried) Seedless raisins, and it recommended final percentages of 40 percent free and 60 percent reserve for both Zante Currant and Other Seedless raisins. It determined that the supplies of the other varietal types would be less than or close enough to the computed trade demands for each of these varietals. In view of these factors, volume control percentages would not be necessary to maintain market stability for the other varietal types.

Pursuant to section 989.54(c), the Committee may adopt interim free and reserve percentages. Interim percentages may release less than the computed trade demand for each varietal type. Interim percentages for Natural (sun-dried) Seedless raisins of 75 percent free and 25 percent reserve were computed and announced on January 15, 1995. That action released most, but not all, of the computed trade demand for Natural (sun-dried) Seedless raisins.

Under section 989.54(d) of the order, the Committee is required to recommend to the Secretary, no later than February 15 of each crop year, final free and reserve percentages which, when applied to the final production estimate of a varietal type, will tend to release the full trade demand for any varietal type.

The Committee's final estimate of 1994-95 production of Natural (sun-dried) Seedless raisins is 379,972 tons. Dividing the computed trade demand of 294,422 tons by the final estimate of production results in a final free percentage of 77 percent and a final reserve percentage of 23 percent.

The free and reserve percentages established by the interim final rule, and continued in effect, without change, by this rule, apply uniformly to all handlers in the industry, whether small or large, and there are no known additional costs incurred by small handlers. Although raisin markets are limited, they are available to all handlers, regardless of size. The stabilizing effects of the percentages impact both small and large handlers positively by helping them maintain and expand markets.

Based on available information, the Administrator of the AMS has determined that the issuance of this final rule will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant information presented, including the Committee's recommendations and other information, it is found that finalizing the interim final rule, without change, as published in the **Federal Register** on May 17, 1995 (60 FR 26344) will tend to effectuate the declared policy of the Act.

#### List of Subjects in 7 CFR Part 989

Grapes, Marketing agreements, Raisins, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR Part 989 is amended as follows:

#### **PART 989—RAISINS PRODUCED FROM GRAPES GROWN IN CALIFORNIA**

Accordingly, the interim final rule adding section 989.248, which was published at 60 FR 26344 on May 17, 1995, is adopted as a final rule without change.

Dated: July 13, 1995.

**Sharon Bomer Lauritsen,**

*Deputy Director, Fruit and Vegetable Division.*
